CONTENTS

Volume 24, Issue Nos. 1–18

MATHEMATICAL METHODS IN THE APPLIED SCIENCES

Issue No. 1, 10 January 2001

Inverse Boundary Value Problem for Ocean Acoustics: M. Ikehata, G. N. Makrakis and G. Nakamura 1

On Traces for Functional Spaces Related to Maxwell's Equations Part I: An Integration by Parts Formula in Lipschitz Polyhedra: A. Buffa and P. Ciarlet, Jr 9

On Traces for Functional Spaces Related to Maxwell's Equations Part II: Hodge Decompositions on the Boundary of Lipschitz Polyhedra and Applications: A. Buffa and P. Ciarlet, Jr 31

A Note on Upper and Lower Solutions for Singular Initial Value Problems: R. Agarwal and D. O'Regan 49

The Skin Effect in Vibrating Systems with Many Concentrated Masses: M. Lobo and E. Pérez 59

Issue No. 2, 25 January 2001

The Combined Relaxation and Vanishing Debye Length Limit in the Hydrodynamic Model for Semiconductors: I. Gasser and P. Marcati 81

End Effects in Thermoelasticity: R. Quintanilla 93

Radial Symmetry and Uniqueness for an Overdetermined Problem: A. Greco 103

Perfect Plasticity as a Zero Relaxation Limit of Plasticity with Isotropic Hardening: K. Chełmiński 117

Issue No. 3, February 2001

Discrete Velocity Models with General Boundary Conditions in a Slab: C. Cercignani and R. Illner 137

On Global Symmetric Solutions to the Relativistic Vlasov–Poisson Equation in Three Space Dimensions: R. T. Glassey and J. Schaeffer 143

On Singular Limits to Bodner–Partom Model: P. Gwiazda 159

An Implicit–Explicit Residual Error Estimator for the Coupling of Dual-mixed Finite Elements and Boundary Elements in Elastostatics: G. N. Gatica, N. Heuer and E. P. Stephan 179

Issue No. 4, 10 March 2001

Exact Boundary Controllability in Problems of Transmission for the System of Electomagneto-elasticity: B. V. Kapitonov and M. A. Raupp 193

On the Stability and Convergence of the Finite Section Method for Integral Equation Formulations of Rough Surface Scattering: A. Meier and S. N. Chandler-Wilde 209

Equilibrium Problem for Thermoelectroconductive Body with the Signorini Condition on the Boundary: D. Hömberg and A. M. Khludnev 233

Inverse Scattering for the Non-linear Schrödinger Equation: Reconstruction of the Non-linearity: R. Weder 245

Issue No. 5, 25 March 2001

The Stokes Equations with Fourier Boundary Conditions on a Wall with Asperities: Y. Amirat, B. Climent, E. Fernández-Cara and Jacques Simon 255

Long-time Convergence of Solutions to a Phase-field System: S. Aizicovici, E. Feireisl and F. Issard-Roch 277

Stability and Convergence of Optimum Spectral Non-linear Galerkin Methods: H. Yinnian, H. Yanren and L. Kaitai 289

L^1 Decay Estimates for Dissipative Wave Equations: A. Milani and H. Yang 319

Issue No. 6, April 2001

Special Issue:
Applied Mathematical Analysis in the Last Century

Variations on the Wave Equation: R. Leis 339

Asymptotics of the Hypergeometric Function: D. S. Jones 369

Spectral Theory—50 years of Progress and a Conclusion: D. B. Pearson 391

Partial Differential Equations of Chemotaxis and Angiogenesis: B. D. Sleeman and H. A. Levine 405

Effect of Anisotropic Permeability on Darcy's Law: L. E. Payne, J. F. Rodrigues and B. Straughan 427

Issue No. 7, 10 May 2001

Non-parabolic Band Hydrodynamical Model of Silicon Semiconductors and Simulation of Electron Devices: V. Romano 439

Smectic A Liquid Crystal Configurations with Interface Defects: M. C. Calderer, C. Liu and K. Voss 473
Analysis of a Time Discretization for an Implicit Variational Inequality Modelling Dynamic Contact Problems with Friction: J.-M. Ricaud and E. Pratt 491

Issue No. 8, 25 May 2001

Stabilization of Infinite-dimensional Second-order Systems by Adaptive PI-controllers: T. Kobayashi 513

Bounds for Mixtures of an Arbitrary Number of Materials: C. Barbarosie 529

Asymptotic Behaviour for a Non-monotone Fluid in One Dimension: The Positive Temperature Case: B. Ducomet 543

FIR Filter Design Problems of Simultaneous Approximation of Magnitude and Phase and Magnitude and Group Delay: R. Reemtsen 561

Boundary Stabilization for a Non-linear Beam on Elastic Bearings: T. F. Ma 583

Issue No. 9, June 2001

Unique Continuation for Systems with Lamé Principal Part: N. Weck 595

Compressible Navier–Stokes system in 1-D: P. B. Mucha 607

An Analytical and Numerical Study of the Stefan Problem with Convection by Means of an Enthalpy Method: E. Casella and M. Giangi 623

On the Numerical Computation of Blowing-up Solutions for Semilinear Parabolic Equations: D. Fayyad and N. Nassif 641

Decay Estimates of Solutions for the Wave Equations with Strong Damping Terms in Unbounded Domains: R. Ikehata 659

On Optimal Control Problems Connected with Eigenvalue Variational Inequalities: I. Bock 671

Issue No. 10, 10 July 2001

Spectral Properties and Time Asymptotic Behaviour of Linear Transport Equations in Slab Geometry: K. Latrach and A. Dehici 689

Evolution Free Boundary Problem for Equations of Viscous Compressible Heat-conducting Capillary Fluids: E. Zadrzyńska 713

Limit Behaviour of Solutions to Equivalued Surface Boundary Value Problem for p-Laplacian Equations: II: L. Fengquan 745

Oscillatory Asymptotic Expansion for Semilinear Wave Equation: S. Di Pomponio . . . 753

Issue No. 11, 25 July 2001

Existence Implies Uniqueness for a Class of Singular Anisotropic Elliptic Boundary Value Problems: F. Ş. Cîrstea and V. D. Rădulescu 771

Non-classical Boundary Value Problems of Elastostatics and Hydrostatics on Lipschitz Domains: D. Mitrea 781

On Diffusion of a Single-phase, Slightly Compressible Fluid through a Randomly Fissured Medium: S. Wright 805

Basic Aspects of Geopotential Field Approximation from Satellite-to-satellite Tracking Data: W. Freeden and V. Michel 827

Numerical Analysis of a Non-singular Boundary Integral Method: Part 1: The Circular Case: P. Dreyfuss and J. Rappaz 847

Issue No. 12, August 2001

Identifiability and Stability Results of One Emerging Crack in Heterogeneous Media by One Boundary Measurements: S. Nicaise and O. Zaïr 865

Cliford Geometric Parameterization of Inequivalent Vacua: B. Fauser 885

On the Diffraction of Poincaré Waves: P. A. Martin 913

One-dimensional Approximations of the Eigenvalue Problem of Curved Rods: J. Tambaca 927

Issue No. 13, 10 September 2001

Scaling Limits for the Ruijgrok–Wu Model of the Boltzmann Equation: E. Gabetta and B. Perthame 949

Exchange of Conserved Quantities, Shock Loci and Riemann Problems: M. Sever 969

Generalized Factorization for N × N Daniele–Khrapkov Matrix Functions: M. C. Câmara, A. F. dos Santos and N. Manojlović 993

Analysis of the Radiation Properties of a Planar Antenna on a Photonic Crystal Substrate: H. Ammari, N. Béreux and E. Bonnetier 1021

Issue No. 14, 25 September 2001

Existence and Uniform Decay for a Non-linear Viscoelastic Equation with Strong Damping: M. M. Cavalcanti, V. N. Domingos Cavalcanti and J. Ferreira 1043

Observability and Stabilization of the Vibrating String Equipped with Bouncing Point Sensors and Actuators: A. Y. Khapalov 1055

A Regularization Procedure for the Auto-correlation Equation: L. Von Wolfersdorf . . . 1073

A Limiting Absorption Principle for Scattering Problems with Unbounded Obstacles: A. S. Bonnet-Bendhia and A. Tillequin 1089

Continuous Dependence on Spatial Geometry for the Generalized Maxwell–Cattaneo System: C. Lin and L. E. Payne 1113

Issue No. 15, October 2001

On the Approximate Solution of some Two-dimensional Singular Integral Equations: V. D. Didenko and B. Silbermann 1125

Asymptotics of Eigenfrequencies and Eigenmodes of Non-homogeneous Inextensible Filament with an End Load: M. A. Shubov, B. P. Belinskiy and C. F. Martin 1139

Mathematical Analysis of some New Reynolds-rod Elastohydrodynamic Models: G. Bayada, B. Cid and C. Vázquez 1169

Kinks and Rotations in Long Josephson Junctions: W. Hauck 1189

Issue No. 16, 10 November 2001

Reliable Solution of an Elasto–Plastic Torsion Problem: I. Hlaváček 1219

Non-linear Stability in the Bénard Problem for a Double-diffusive Mixture in a Porous Medium: S. Lombardo, G. Mulone and B. Straughan 1229

A New Integral Equation Approach to the Neumann Problem in Acoustic Scattering: P. A. Krutitskii 1247

A Critical Look at the Kinematic-wave for Sedimentation–Consolidation Processes in Closed Vessels: R. Bürger and M. Kunik 1257

Non-linear Singular Integral Equations on a Finite Interval: P. Junghanns, G. Semmler, U. Weber and E. Wegert 1275

On the Denseness of Herglotz Wave Functions and Electromagnetic Herglotz Pairs in Sobolev Spaces: D. Colton and R. Kress 1289

Issue No. 17–18, 25 November–December 2001

Special Issue:
Biofluiddynamics

Editorial 1305

Sir James Lighthill, 1924–98: J. R. Blake 1307

Vascular Fluid Dynamics and Vascular Biology and Disease: C. G. Caro 1311

Biopolymer Mechanics: Stability, Dynamics, and Statistics: C. H. Wiggins 1325

Chaos and Mixing in Micro-biological Fluid Dynamics: Blinking Stokeslets: B. A. A. Orme, S. R. Otto and J. R. Blake 1337

Simulating the Effects of Fluid Viscosity on the Behaviour of Sperm Flagella: C. J. Brokaw 1351

Responses of a Parasitic Protozoan to Osmotic Stress: J. J. Blum 1367

A New Method for Explaining the Generation of Aerodynamic Forces in Flapping Flight: S. Sunada and C. P. Ellington 1377

Optimization of Energetic Advantages of Burst Swimming of Fish: S. Stöcker and D. Weihs 1387

Some Aspects of Reynolds Number Effects in Animals: W. Nachtigall 1401

Modelling of Ciliary Downstream Collecting in Suspension-feeding Invertebrates: S. Mayer 1409

Biofluiddynamics of Lubricating Bacteria: I. Cohen, I. Golding, I. G. Ron and E. Ben-Jacob 1429

Microbiological Fluid Mechanics: A Tribute to Sir James Lighthill: J. R. Blake 1469

Mathematical Modelling of the Avian Flight Power Curve: J. M. V. Rayner 1485

Computation of Insect Hovering: Z. J. Wang 1515

Transitions in Function at Low Reynolds Number: Hair-bearing Animal Appendages: M. A. R. Koehl 1523

The LGL (Lighthill–Gueron–Liron) Theorem—Historical Perspective and Critique: N. Liron 1533

Mathematical Biofluiddynamics and Mechanophysiology of Fish Locomotion: T. Y. Wu 1541

A Stable Calcium Gradient near the Plasma Membrane: A. Braiman, V. Gold'shtein and Z. Priel 1565

The Three-dimensional Motion of Slender Filaments: S. Gueron and K. Levit-Gurevich . 1577
